

# Your handy checklist

## Dealer tips

**Talk to your dealer first.** They'll ask you everything they need to know so they can bring you the product that suits you best.

**Take your time.** Check it does everything you want it to. Remember some controls might be awkward at first.

**Ask questions.** If you're not sure about how anything works, ask your dealer now.

**Do not feel pressured.** If the product doesn't feel right, do not accept it. Test drive others. You can even change dealers.

**Make sure you're happy.** This is about you getting the product that makes life easier for you. Do not say yes until you're completely happy.

## Your notes

### Sitting in the powered wheelchair

Can you reach the joystick?

Yes / No 

Can you use the controls comfortably?
