

Ten important checks before you drive away your new car

Spend some time going through this checklist with your dealer on collection day. Take it with you and tick off as you go. It's important you know how to:

1. ☐ Adjust your seat and steering wheel positions
2. ☐ Work the sat nav and other information systems
3. ☐ Put on your handbrake and take it off
4. ☐ Adjust your mirrors
5. ☐ Turn your lights and indicators on
6. ☐ Use any parking sensors, lane departure systems, or other technology to help you drive
7. ☐ Use your windscreen wipers
8. ☐ Check there is no damage on or in the vehicle

And if you're getting an electric car, make sure you know how to:

9. ☐ Plug in and charge your car
10. ☐ Set the regenerative braking, if you have it
